WARD Flex®

THE SMART CONNECTION

SMOOTH SAILING ON THE SHORES OF THE POTOMAC

It's National Harbor on the shores of the historic Potomac River – and WARD FLEX® is there. We're doing our part to help make this monumental, mixed-use project run smoothly, on schedule and within budget. And when time is money, "in budget" translates directly into "at a profit." That's the story of WardFlex. It's the product that revolutionized the gas plumbing industry – using flexible stainless hose to dramatically reduce the time and expense that gas plumbing used to cost using rigid steel pipe. Smooth flowing progress at National Harbor, thanks to Ward on Board: just what you'd expect from the Smart Connection.
